The screenshot shows the OpenWeather API page in a web browser. The browser's address bar displays 'openweathermap.org/api'. The page features a dark navigation bar with the OpenWeather logo and a search bar. The main heading is 'Weather API', with a breadcrumb trail 'Home / Weather API'. The content area explains that users should sign up to use the APIs and recommends the 'One Call API 3.0'. A 'Subscribe' button is visible. Below this, it states 'Make one API call and receive all essential weather data in one response:' followed by a list of features: 'Minute forecast for 1 hour', 'Hourly forecast for 48 hours', 'Daily forecast for 8 days', 'Historical data for 40+ years back by timestamp', and 'National weather alerts'. To the right, the pricing is listed as 'Pay as you call' with '1,000 API calls per day for free' and '0.0012 GBP per API call over the daily limit'. A 'Subscribe to One Call by Call' button is at the bottom right.
